

## **COP21 – Irish Green Building Council Commitment**

### **Value Chain Transformation**

By 2020, we will work with partners to ensure that 60,000 construction workers can undertake training in energy efficiency, through the [QualiBuild Foundation Energy Skills Programme](#).

By 2020, we will have trained over 500 professionals in green building certifications

### **Finance**

We will work with our members to promote and develop tools and standards, such as the [Home Performance Index \(HPI\)](#), that will ensure there is a way of measuring the carbon impacts across the entire life cycle of buildings and will drive investments in green building

We will strengthen the business case for investment in green buildings by promoting the co-benefits of health and wellbeing through campaigns such as the "[Better Places for People](#)"

### **Government Policy and Strategy**

We will work with the government and local authorities to accelerate the rate of change in Ireland to a sustainable built environment

We will build consensus on how to decarbonise the built environment by bringing together over 100 stakeholders from the financial, construction, and civil society to develop and agree a long term renovation strategy for Ireland to 2020 and beyond through the [BuildUpon project](#).
