RG3 Panel by Kingspan Access Floors Ltd

CLASSIFICATION: 09 69 00

PRODUCT DESCRIPTION: The RG3 panel is based on a 600mm-square module made of a high-performance high-density particle chip-board core in a galvanised steel envelope. The galvanised-steel shell comprises a top sheet that is wrapped around and laminated to the core, then mechanically-stitched to the bottom steel sheet for greater strength and to provide full electrical continuity and static dispersion of the system where required. This unique wrap-around construction makes panel removal and replacement easy whilst also improving panel edge strength. Used with an appropriate type of pedestal, RG3 panels give loose-laid access floor systems compliant with the requirements of the European Standard BS EN 12825

Summary of product contents and results from screening individual chemical substances against HPD Priority Hazard Lists and the GreenScreen for Safer Chemicals®. The HPD does not assess whether using or handling this product will expose individuals to its chemical substances or any health risk. Refer to Section 2 for further details.

INVENTORY AND SCREENING NOTES:

This panel contains bio-based materials that cause the LEED v4 prechecks to fail. HPD does not currently have a way to deal with bio-based substances that complies with all the screened and identified materials. The Quartz database for common building materials was used when the manufacturer's information was lacking CAS identifiers or in cases where the material is not manufactured by Kingspan and secondary material information has been relied on. Comparing and contrasting Kingspan's own documentation against the generic product database allowed for a more robust screening than using the documentation alone.

C Yes No PREPARER: Self-Prepared VERIFIER: VERIFICATION #: SCREENING DATE: 2018-04-06 PUBLISHED DATE: 2018-04-06 EXPIRY DATE: 2021-04-06 This section lists contents in a product based on specific threshold(s) and reports detailed health information including hazards. This HPD uses the inventory method indicated above, which is one of three possible methods:

- Basic Inventory method with Product-level threshold.
- Nested Material Inventory method with Product-level threshold
- Nested Material Inventory method with individual Material-level thresholds

Definitions and requirements for the three inventory methods and requirements for each data field can be found in the HPD Open Standard version 2.1, available on the HPDC website at: www.hpd-collaborative.org/hpd-2-1-standard

This section lists applicable certification and standards compliance information for VOC emissions and VOC content. Other types of health or environmental performance testing or certifications completed for the product may be provided.

VOC EMISSIONS	CDPH Standard M Office scenario	CDPH Standard Method V1.1 (Section 01350/CHPS) - Classroom & Office scenario			
CERTIFYING PARTY: Third Party APPLICABLE FACILITIES: Marfleet, Hull, UK	ISSUE DATE: 2015- 01-27	EXPIRY DATE:	CERTIFIER OR LAB: Eurofins Product Testing A/S		
CERTIFICATE URL:			-		

CERTIFICATION AND COMPLIANCE NOTES: Meets VOC emissions specifications in LEED EQ credit "Low-emitting products": the requirements of CDPH-IAQ (California Department of Public Health), and a TVOC below 0.5 mg/m³ in both office and classroom.

SUSTAINABLE FORESTRY	FSC Certification - Chain of Custody (COC)			
CERTIFYING PARTY: Third Party APPLICABLE FACILITIES: Kingspan Access Floors, Marfleet, Hull, UK CERTIFICATE URL:	ISSUE DATE: 2017- 09-27	EXPIRY DATE: 2022- 09-26	CERTIFIER OR LAB: SGS	
CERTIFICATION AND COMPLIANCE NOTES:				
LCA	Environmental Product Declaration by EuGeos			
CERTIFYING PARTY: Third Party APPLICABLE FACILITIES: Kingspan Access Floors, Marfleet, Hull, UK CERTIFICATE URL: http://www.environdec.com/en/Detail/epd798	ISSUE DATE: 2016- 02-01	EXPIRY DATE: 2021- 01-31	CERTIFIER OR LAB: Ugo Pretato	

CERTIFICATION AND COMPLIANCE NOTES: The EPD applies to a complete access floor system based on the RG3 panel

😑 Section 4: Accessories

This section lists related products or materials that the manufacturer requires or recommends for installation (such as adhesives or fasteners), maintenance, cleaning, or operations. For information relating to the contents of these related products, refer to their applicable Health Product Declarations, if available.

EURO PEDESTAL

The Health Product Declaration (HPD) Open Standard provides for the disclosure of product contents and potential associated human and environmental health hazards. Hazard associations are based on the HPD Priority Hazard Lists, the GreenScreen List Translator™, and when available, full GreenScreen® assessments. The HPD Open Standard v2.1 is not:

- a method for the assessment of exposure or risk associated with product handling or use,
- a method for assessing potential health impacts of: (i) substances used or created during the manufacturing process or (ii) substances created after the product is delivered for end use.

Information about life cycle, exposure and/or risk assessments performed on the product may be reported by the manufacturer in appropriate Notes sections, and/or, where applicable, in the Certifications section.

The HPD Open Standard was created and is supported by the Health Product Declaration Collaborative (the HPD Collaborative), a customer-led organization composed of stakeholders throughout the building industry that is committed to the continuous improvement of building products through transparency, openness, and innovation throughout the product supply chain.

The product manufacturer and any applicable independent verifier are solely responsible for the accuracy of statements and claims made in this HPD and for compliance with the HPD standard noted.
