

QUALIFIED ECO EPD OFFICER

Get Ready for Mandatory Environmental Product Data Declaration! Build your EPD knowledge through our three course levels to become an EPD Decision Maker and Project Manager.

[Click here to visit the ECO Education website!](#)

OBJECTIVES

With the upcoming Construction Products Regulation, disclosing the environmental performance of construction products will become mandatory.

Environmental Product Declarations (EPDs) are rapidly becoming essential for sustainability strategies in the construction sector.

Are you prepared for this shift?

SOLUTION

The 'Qualified ECO EPD Officer' course provides the orientation you need. What's coming up for you? How can you adapt to these new requirements? What basic knowledge is essential? What internal and external resources are needed? And most importantly, how can you set up affordable and competitive solutions to stay ahead in a net-zero economy?

Equip yourself with the expertise to integrate EPDs effectively into your organization and secure your place in the future of sustainable construction.

BENEFITS

Benefit from the practical experience of ECO Platform in the field of LCA and EPD

Gain insights from experts with years of hands-on experience in life cycle assessment (LCA) and environmental product declarations (EPD), helping you navigate this complex field with confidence.

Get orientation about upcoming requirements

Stay ahead by understanding the new mandatory requirements for environmental product declarations under the Construction Products Regulation.

Be in the position to design your solution in an affordable and competitive way

Learn how to develop cost-effective strategies and solutions that keep your organization competitive in the evolving construction market.

Level 3: April 28 – 30, 2025

COSTS

990 EUR + VAT (member) //

1,490 EUR + VAT (non-member)
per level

VOICES FROM THE PILOT COURSE

TERESA KLEBER

LEDVANCE GmbH

"The course gave me a clear understanding of LCA principles, EPD creation, and regulatory requirements in Europe. I now feel confident navigating standards, ensuring compliance, and effectively comparing product impacts. The participant exchanges were especially insightful and enriching."

ELISABETH BAUMANN

Knauf Ceiling Solutions

"I really enjoyed the course. Everything was explained clearly and understandably. There was great documentation and practical examples. Even as a beginner, it was easy to follow."
